

VOLUMIO Custom Keyboard

```
sudo apt-get install matchbox-window-manager matchbox-keyboard
```

```
sudo chmod 777 /opt/volumiokiosk.sh
```

```
sudo nano /opt/volumiokiosk.sh
```

```
#!/bin/bash
xset +dpms
xset s blank
xset 0 0 120

matchbox-keyboard -d &
matchbox-window-manager -use_titlebar no &

while true; do
    /usr/bin/chromium-browser \
        --no-touch-pinch \
        --kiosk \
        --no-first-run \
        --disable-3d-apis \
        --disable-breakpad \
        --disable-crash-reporter \
        --disable-infobars \
        --disable-session-crashed-bubble \
        --disable-translate \
        --no-sandbox      http://localhost:3000
done
```

If you want a different keyboard layout, you can copy a custom `keyboard.xml` to `/root/.matchbox/`.
